Fly Cutter, P/N 3052

P/N	NAME	WT.	PRICE
3052	Fly Cutter	.5 lb.	\$35.00

About the Fly Cutter...

Fly cutters are used primarily on a milling machine for machining large, flat surface areas. The fly cutter is a single-point cutting tool similar to a lathe tool mounted in a special holder. The cutter can be adjusted to cut up to a 2.00" (51 mm) diameter and is easily capable of taking a .010" (.25 mm) deep cut in aluminum at this diameter.

The Sherline fly cutter comes complete with the holder, drawbolt, thrust washer and a left-hand carbide cutting tool. It is a worthwhile addition to any shop.

Sherline also offers an inserted tip fly cutter for those who prefer to work with inserted tip carbide tools. See P/N 7620.
